

# GUANTE **G-40 LÁTEX**

## Descripción:

Los guantes de protección KLEENGUARD® G40 recubiertos con látex, son los guantes de protección industrial de uso general ideales para proteger a las personas de los procesos, con un excelente nivel de agarre, destreza y comodidad.

**KLEENGUARD™**

## Características:

- El guante está fabricado de un tejido de punto de poliéster y algodón negro sin costuras, que provee comodidad, mejor ajuste, mayor destreza y respirabilidad al usuario, además de ocultar la suciedad y las manchas.
- Esto se traduce en una mayor productividad y durabilidad para el usuario cuando se le compara con otros guantes de protección general, tales como el cuero y la carnaza.
- Las costuras en la punta de los dedos son parte de las razones por las cuales, otros guantes de protección proveen menor destreza y comodidad al usuario.
- Estos guantes tienen una banda elástica en la muñeca con código de colores que permite identificar la talla. El guante tiene un recubrimiento rugoso de látex, que provee una capa con excelente resistencia al rasgado (calificación 4 de 4 conforme a la EN388), excelente agarre en seco y durabilidad. También cumple con el estándar EN 407 de resistencia al calor solo por contacto dando protección a temperaturas menores a 250 grados centígrados por un máximo de 15

segundos que sea en forma intermitente.

- Estos guantes no deben ser usados en trabajos en los que haya peligro de enredarse en partes de maquinaria en movimiento.

## Aplicaciones:

- Ensamblajes de piezas medianas – pequeñas.
- Labores de almacén, envío y entrega de mercancías.
- Construcción y albañilería.
- Manipulación de materiales.
- Mantenimiento en general.
- Operaciones de cableado.
- Empleo de herramientas e instrumentos • Áreas de inspección.

## Certificaciones:

- El estándar Europeo EN 420: 2003
- El Estándar Europeo EN 388:2016
- El estándar Europeo EN 407:2004
- Certificación IRAM

# TERMS AND CONDITIONS

The following conditions apply in addition to SATRA's standard terms and conditions of business and those given in the current certification agreement.

The certificate holder is licensed to mark the products detailed within this certificate in accordance with Annex V (Module B) of the Regulation (EU) 2016/425 of the European Parliament and of the council of 9th March 2016 on personal protective equipment once you have drawn up an EU declaration of product conformity. Please note:

1. Where the product is classified as category III then CE Marking of production is reliant on current compliance with Regulation 2016/425 module C2 or Module D. (Except that specifically produced to fit an individual user).
2. Full details of the certification and product are contained within the manufacturer's technical documentation.
3. Where a translation of this certificate exists, the English language version shall be considered as the authoritative text.
4. Certification is limited to production undertaken at the sites listed in the manufacturers technical documentation.
5. Ongoing manufactured product shall be consistent with the product(s) certified and listed on this certificate.
6. The Manufacturer shall inform SATRA of any changes to the certified product or technical documentation.
7. This certificate shall be kept together with the relevant technical documentation in a safe place by the client named on this certificate. Production of this certificate and other documentation may be required by a representative of the EC member state government.
8. This certificate relates only to the condition of the testable items at the time of the certification procedure and is subject to the expiry date shown.
9. SATRA Technology reserves the right to withdraw this certificate if it is found that a condition of manufacture, design, materials or packaging have been changed and therefore no longer comply with the requirements of Regulation 2016/425.
